MOBILE APP

Mobile App

Create a workplace as mobile as your workforce.

Your workforce is on the move — so get your workplace on-the-go. Whether your team is on site or working remotely, connect people and technology through Korbyt Anywhere's mobile app. Create and publish personalized, relevant content and data based on an individual's particular job, interests and behavior.

Employee Focused

Design a secure, branded and personalized mobile experience that propels workforce engagement.

- ▶ Publish content in multiple post formats like video, images, links, articles, polls and surveys
- ▶ Target specific audiences using attributes such as job type, department, location and more to deliver content that matters to each individual, team or region
- ▶ Embed any content into a post using embed codes, including videos, livestreams, and surveys
- ▶ Drive more engagement by enabling employees to submit content, join conversations, or share knowledge
- ▶ Encourage users to engage with content by liking, commenting, sharing, or bookmarking posts, and manage their engagement via moderation

Action-Oriented Behavior

Use Korbyt Anywhere's promotion and notification features to inform users and amplify actions.

- › Generate and send push notifications to users' mobile devices
- › Promote your content with email, sms/text, or in app notifications
- › Target specific audiences to deliver urgent alerts and critical information
- › Enable users to acknowledge specific content so you know they took action

Tap Here for Resources

Unlock the digital workplace for employees with personalized access to the systems, resources and business apps they need to get work done.

- › Authorize employees to find and access other important business apps on their mobile device like Teams, Slack, Zoom or Workday
- › Provide targeted, secure access to digital resources like a benefit provider, knowledge base, intranet or any URL
- › Format and deliver data visualizations, KPIs, dashboards and more to drive greater productivity
- › Display maps for mobile wayfinding or enable mobile reservations and check-in to company offices and facilities
- › Integrate with a wide range of platforms and web services, or use our API to develop unique connectors to link personalized data to employees
