Space Management

Welcome employees and guests back to the office with a smart, interactive solution that manages the safety, display and reservations of your in-house and remote work environment.

Korbyt Anywhere's Space Management features enable Admins to create and manage interactive maps of the workplace to enable employees and visitors to find and reserve safe spaces to work. Connect the hybrid work experience through digital signage and displays, desktops and mobile devices to direct employees and visitors, while a smart reservation system secures available conference rooms and workstations for teams and individuals.

- › Locate and reserve rooms, desks and workspaces
- › Check-in, change or extend reservations easily
- › Receive check-in and “at capacity” notifications and alerts
- › Book and manage reservations from display and kiosk screens, mobile and desktop

Smart Reservations for Your Hybrid Workplace

Find the best, safe space for the individual, team and task.

Matchmaking people and places. Our real-time reservation system matches conference room and workstation availability with the needs of your workforce. Align available space with proper social distancing related to safety and health. Through a dynamic balancing of individual needs and the whole organization, seating arrangements and space utilization becomes a seamless, efficient experience that allows an individual or team to arrive at a location and get right to work.

Dynamic Maps that Direct Action

Turn your maps of your workplace into enhanced on-the-go screens that guide your workforce and visitors to every available location.

Meet the GPS for your workplace. When you upload your maps to the Korbyt Anywhere platform, your space becomes truly interactive. Explore scenario-planning based on space utilization, safety needs, and integrations with check-in technologies. Map and manage an agile, flexible environment to bring out the best in your space for your employees and guests.

- ▶ Upload maps of a single floor, a building or an entire campus
- ▶ Draw regions around spaces you want to make available for reservation
- ▶ Establish safe-protocol capacity for each region
- ▶ Connect Korbyt Anywhere to your visitor management technology for integrated gated access

Manage the Visitor Experience on Every Screen

Visitor management creates a safe, secure and welcoming experience for visitors and employees.

Think of it as the pro-level, “Mi casa, su casa.” Simplify visitor check-in with self-serve registration, utilize real-time access to visitor logs and manage space capacities on-demand.

› Empower and ease the minds of visitors and employees with touchless check-in

› Activate temperature sensors, cameras and security checks at key entry points from one central location

› Quickly build kiosk displays with the code-free Kiosk Builder, enabling easy visitor wayfinding, reservations and check-in
